Finspark was a website based quiz activity where the students of 1st year MBA played a game of quiz which was designed to boost their knowledge in the field of finance and was a mirror to their knowledge in finance. Questions relating to current affairs related to finance were asked to the students.

Blooket is a web-based quiz game platform for group competition. Blooket joins an expanding group of game show platforms for the classroom. Once students have created an account all they need to do is input the game ID for the game or homework their teacher asked them to complete, add their nickname/icon, and get started! **Students can access Blooket on their own and play online games with their favorite modes in a variety of subjects,** a new take on trivia and review games!

The way it works is that a teacher/host picks a question set and a unique game mode. Then, we generate a code that players can use to join the game on their own devices. After the game starts, players will answer questions to help them win. That's where the fun starts, because we offer a variety of games to keep students engaged and excited!

There also was a game being played alongside the quiz where the players could steal others points and earn points based on their swiftness .

eLearning is a very popular method of attaining knowledge, the use of which has increased manifold in recent times. eLearning is a structured course that is delivered through an electronic medium. eLearning comprises various content types.
