“One day Work shop ON ACADEMIC projects, analysis and interpretation using SPSS”

SPSS (Statistical Package for the Social Sciences) is a data management and analysis product produced by IBM SPSS. Among its features are modules for statistical data analysis, including descriptive statistics such as plots, frequencies, charts, Chi square, analysis of variance (ANOVA), factor analysis, this were brought to light to students understanding.

The objective of this program was to introduce participants/students to perform the basic practice, analysing and interpret SPSS output.

The training programme was conducted offline and programme was participative in nature. The training was consisting of detailed demonstration on using the SPSS with student’s using latest trial version SPSS 25. Every demonstration was required to be self-performed by the participants on the published/hand copy provided as micro data set, therefore it was advised to install SPSS on their laptops.
