DEPARTMENT OF ARTIFICIAL INTELLIGENCE & DATA SCIENCE

EXPERT TALK ON GENERATIVE AI

Generative AI tools are an emerging class of new-age artificial intelligence algorithms capable of producing novel content — in varied formats such as text, audio, video, pictures, and code — based on user prompts. Recent advances in machine learning (ML), massive datasets, and substantial increases in computing power have propelled such tools to be introduced to students.

Department of Artificial Intelligence and Data Science organized expert talk on Generative AI. Mr. Sridev Ramesh introduced Generative AI to students and road map to becoming Generative AI Engineers. Students who are interested were invited to join the cohort that 100xEngineers was offering at a 10% discount for KSSEM.

Date of Expert Talk   : 10th January, 2024

Venue   : Architecture Seminar Hall

Resource Persons   : Mr. Sridev Ramesh, 100xEngineers

Student list enclosed.
