DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

Waste management refers to the process of collecting, treating, and disposing of various types of waste materials in a safe and environmentally responsible manner. It involves a range of activities such as garbage collection, recycling, composting, landfill management, and energy recovery.

Proper waste management helps prevent pollution of air, water, and soil. It reduces the release of harmful substances into the environment, minimizing negative impacts on ecosystems, wildlife, and human health.

Department of Artificial Intelligence organized expert talk on Waste Management as part of NSS and SCR activities for III Semester and V Semester students.

Resource Person :

D.R. Kumaraswamy Graduated (B.E. Civil) at Davangere from GBDT College of Engineering and Completed Master Degree (Environmental Engineering) from BVM

College of Engineering, V.V. Nagar, Anand, Gujarat State. He served and retired from Karnataka State Pollution Control Board Bengaluru. During his tenure he conducted studies and attended several workshops abroad (Germany, Singapore, Austria, France, Sweden, Holland, Switzerland, Italy and Dubai). With the expertise that he gained by these visits, he conducted several awareness programmers. He also published 12 books on Environmental Pollution Control in Kannada language.

He received following awards for his service i Environment Pollution control -

- ParisaraRatna
- Swarna Bhushana
- Karnataka Seva Puraskara
- Best Environmental officer

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

Following are few topics that the expert covered during his talk -

- Environment acts and rules in India
- Micro plastic in bottled water
- Plastic in stomach
- Pollution control board
- Aerobic composting
- Bulk waste generator
- Duties of waste generator
