

**A REPORT  
OF  
INAGURATION  
OF  
CENTRE OF EXCELLENCE FOR  
SUSTAINABLE CONSTRUCTION  
PRACTICES AND MATERIALS**

**On**

**25<sup>th</sup> March 2024**

***Organized***

***By***

**Department of Civil Engineering  
K.S.School of Engineering & Management  
#15,Near Vajarahalli, Mallsandra, Kanakapura Road,  
Bengaluru-560109**

**Report on Inauguration of Centre of Excellence for Sustainable  
Construction Practices and Materials**

Organized by: Department of Civil Engineering

Participants: **Academicians** and **Industry Practitioners**

Location: Centre of Excellence for Sustainable Construction Practices and Materials

Date: 25.03.2024

### **Objectives of the Programme**

- Promote Industry-Academia Collaboration
- Foster Sustainable Practices
- Skill Development & Training
- Research and Innovation
- Knowledge Dissemination
- Empower Future Engineers

### **Outcomes of the Programme**

#### **Enhanced Practical Knowledge**

- Students gain exposure to real-world construction materials and technologies through practical sessions and site interactions.

#### **Sustainability-Oriented Mindset**

- Increased awareness and application of eco-friendly construction methods among students and faculty.

#### **Research Publications and Projects**

- Encouragement of student-led and faculty-guided research projects on sustainability themes.

#### **Industry Readiness**

- Improved employability of graduates through alignment with industry needs and standards.

#### **Innovation and Incubation**

- Incubation of innovative ideas for sustainable construction materials and practices.

#### **Capacity Building**

- Enhanced capabilities of faculty, students, and professionals through continuous learning programs.

## Summary of the Visit

The Department of Civil Engineering, in partnership with **UltraTech Cement Limited**, established the **Centre of Excellence for Sustainable Construction Practices and Materials** on **25th March 2024**. This initiative is a forward-thinking academic-industry collaboration designed to foster innovation, sustainability, and skill development in the construction sector. The centre serves as a dynamic platform for students and professionals to interact with industry experts, learn about sustainable materials, and explore innovative technologies in real-world construction applications.
