LETTER OF RECOMMENDATION

I am pleased to introduce **Anup** who has been my student for the past two years and is currently in his final year of the civil engineering undergraduate programme. During his time in the programme, I have had plenty of opportunity to estimate his theoretical and practical capabilities. I found him to be a diligent and ambitious student who is consistently putting forward his best efforts in learning and showing great prudence to task at hand.

Few of the subjects that I have taught him in his academic curriculum are, **Analysis of Indeterminate Structures, Building Materials Testing Laboratory**. I am currently teaching him Quantity surveying and Contracts Management, in which he has taken a special interest. He is attentive in class and is a fast learner. He completes tasks given to him with great confidence and makes sure to meet his deadlines.

Scaling all his abilities pertaining to both theoretical and practical and in accordance with his overall academic performance of 5th and 6th semester, I would rate him in the top 10% of students I have come across in this batch. I am certain he will uphold his mettle and prove himself to be a stellar graduate student. **I therefore strongly recommend his candidature for admission into his desired course of the graduate programme at your prestigious university.**

With Best Regards,

Sushma M 5/01/22
