LETTER OF RECOMMENDATION

It gives me great pleasure to write this letter of reference for Mr. K ESWAR BABU, one of our department's students. As a Professor, I discovered that he possesses enormous talent and enthusiasm for graduate studies, as well as being a student with high moral and ethical standards. Over the course of four years, I had the opportunity to work closely faith him,

I have taught him Computer Graphics'. He is one among the bright students. He has good knowledge of the basic principles underlying the above subjects. His intuitive and methodological work helped him develop a broader perspective as well as mastery over the fundamentals. He has demonstrated good leadership qualities and has been at the forefront of organizing many activities. He was an active member of our college's Entrepreneurship Cell, organizing numerous activities such as Startup Stack, and the manner he handled it and his organizational abilities were exceptional, earning him praise from all our department's staff members.

I firmly believe that all the above qualities coupled with his pleasing conduct, adaptability, and initiative has convinced me to rank him among one of the good students associated with me. Considering his keen interest in pursuing higher studies. I strongly recommend Mr. K ESWAR BABU for his admission into your graduate program with suitable financial aid.
