Sir/Madam

Sub: Appointment of Question Paper Setter for the Examination- December 2021

It is my pleasure to inform you that, you have been appointed as a Question paper setter for the B.Tech Examinations of **December 2021** by the directions of the Hon. Vice Chancellor.

I request you to prepare a set of question paper for the subject as per the details given below:

Semester	5
Branch	DS
Subject Code	18DS5DE11
Subject Title	Datawarehousing and Data mining
Last date of submission: 8th November 2021	

Sl. No.**Details**

- 1 Eight questions are to be set covering entire syllabus. **(student shall answer 5 full question)**
Q1 and Q2 are compulsory from UNIT 1 and UNIT 2 respectively.
Q3 and Q4 from UNIT 3, Q5 and Q6 from UNIT 4, Q7 and Q8 from UNIT 5.
- 2 There shall be a maximum of three sub divisions under each question. Numerical problems shall be set wherever possible.
- 3 Each question will carry **14 marks**.
- 4 Provide instruction on issue of handbooks, steam tables, charts etc., wherever absolutely necessary.
- 5 Take care to see that all data required are provided.
- 6 **Furnish the soft copy of the question paper along with the hard copy of question paper and scheme and solution.** [Scheme and solution can be hand written hard copy]
Figures can be neatly drawn, scanned and pasted in the question paper.
- 7 The scheme and solution should contain detailed step by step solution along with distribution of marks accounting for the total marks allotted for the question. For questions seeking descriptive answers, the important points to be covered are to be mentioned; mere breakup of marks will not be sufficient.
Question paper without scheme and solution is liable for rejection.

- 8 Set questions such that they demand specific answers.
- 9 Indicate any alternate answer or solution to a problem (if any) in the scheme.
- 10 Ensure that no hard copy or soft copy of any material relevant to question paper is retained by you.
- 11 Kindly return the declaration form duly signed.
- 12 Prepare and enclose the bill as per the remuneration shown in the following table along with your Bank account details.

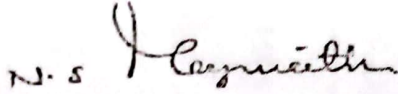

Ensure that the question paper along with scheme and solution reaches the undersigned on or before 8th November 2021.

Official Letter for the IAENG Membership

Member Name: Sandhya Ashok Kulkarni

Member Number: 315550

IAENG is a non-profit international association for the engineers and the computer scientists. IAENG has been found by a group of engineers and computer scientists from over thirty different countries. Our goals are to promote the co-operation between the professionals in various fields of the engineering and to cultivate an environment for the advance and development of the technology. Our objectives include:

- Promoting the interactions between the engineers;
- Advancing the application of engineering techniques from the academics to the industry;
- Facilitating the exchange of information and ideas among the engineers and scientists freely.

This letter is to certify that the above person is an IAENG member. For the information about IAENG Membership, please visit our website <http://www.iaeng.org/membership.html>

If you have any question, you are very welcome to contact us at any time.

Best regards,

Joan Mok
Assistant Secretary

Dear All,

Kindly find the telecalling database, it is segregated sheet wise. Kindly make the calls and write the response in the sheet. This is assigned for one week, considering 50 calls per day and around 300 calls in a week.

Thanks and Regards,

ABSTRACT:

Huge information carries advantages to numerous territories of logical exploration, anyway handling these a lot of information regularly requires broad registering time and a huge extra room. Super Resolution project, thinks about critical areas, and accordingly proposes another super goal approach that utilizes huge and wide-ranging data under the structure of a CNN. The preparation interaction is accomplished for the huge pieces of informational collection, reproduction cycle which are been considered critical parts independently. The focal point of Super Resolution is to create a higher goal picture from lower goal pictures.

KEYWORDS: logical exploration, High Resolution Low Resolution, convolutional Neural Network.

I. INTRODUCTION

Picture or image are defined as a point by which the light rays emerging from an object are converged or appears to be converged after reflection or refraction. It is also referred as a collection of colored points on a flat surface [1-2]. Super Resolution imaging is one of a class of technique which enables the resolution of the imaging system. Single image super resolution will always undergo a classical image restoration problem which are used to improve a high- resolution image from their equivalent low-resolution image [3-6].

A part of the image is cropped and zoomed for visualization [7-8]. The advantages are there is no need for hardware training, extensive training time and large datasets, and the limitations is it is less accurate. We will increase the quality and pixel of the images to enhance the quality of degraded images [9]. We have been suggested a deep learning technique for this single image super resolution to illustrate the traditional sparse coding-based image super-resolution [10]. Our technique rightly expands with end-to-end mapping with low- resolution and high-resolution images. The recording are predicted as a deep convolutional neural network which considers the low- resolution image as the seeding input and expects the outcome as high-resolution one. SR methods are viewed along with this DCN [11-15].
