PRINCIPAL**

On 19th March 2022, Saturday - we visited Ashraya Seva Trust which was organized by our college - KSSEM.

It was one of the most heart touching experiences in our life. All students were involved by heart and participated actively for making this initiative successful.

Prof. Rupa Chatterjee Das Ma'am is the mentor of ISR (Individual Social Responsibilities) club, and she took the main role to guide all of us for making this program successful.

We students also gave our hundred percent and involved ourselves accordingly.

We all were happy and touched that we got this kind of opportunity to participate and learnt many things as well.

As guided by my Rupa Ma'am, we arranged an engagement program for elderly people over there and few girl students from our class started the program with a beautiful song. Later, Prof. Sreedhar N Sir, our class teacher performed an act-mimicry of Dr. Rajkumar in the program. Sir's acting was so thrilling that all became happy and enjoyed the moment a lot. Rupa ma'am sang a devotional song and our HOD Sir also shared his beautiful thoughts with all of us.

We students and teachers interacted with elderly people closely so that they can feel friendly and comfortable with all of us. We were also becoming family members for that moment with all of them. We cannot change their life, but we can stand

beside them, able to give them little happiness and company for few moments. Life is not so easy, so many challenges people need to face day by day we got an idea after visiting this, Trust.

Along with our visit, we had provided vegetables, fruits, grocery items, snacks items, health drinks etc. which we all students and faculties contributed from our end for all elderly people in the trust.

donated the items for providing them little more support and wished they should stay happy and healthy forever.

We thank our MBA department and lectures for showing us and teaching us the value of our parents and elderly people in our life. This program brought a very good positive vibes in our life. Made us more practical, helped to build a positive thought in our mind as well. Also, we would like to like to thank our lectures for giving us this kind opportunity where we can participate and learn many things and become a good human being in future for our society.
