

Interactions with Alumni

The essence of alumni meets used to be back in classrooms to relive cherished moments spent in the company of friends years later. However the alumni associations are beginning to serve a larger purpose now – contributing back to their alma mater, be it infrastructure development, scholarships and grants, placements, guest lectures or industry interaction. The role played by the alumni is significant. The influence that the illustrious and successful alumni can have on the student community of a particular institution is quite significant and also encourages the students to contribute substantially after they themselves become alma matter. .

With the formal registration of KSSEM Alumni Association, the interactions with alumni are picking up. With the graduated students spread all over places and with their busy schedule, it is difficult to get members together at one place and one time. The institute adapts a standard procedure now to engage the alumni members in small discussion with faculty members, whenever they visit the parent department. The general topics discussed in such meetings are:

- i. The individual experience while transiting from college life to corporate world
- ii. The role played by institute in shaping up their professional life
- iii. Any opportunities for final year students to seek job with their referral/recommendation
- iv. Internship opportunities for students
- v. Explore and schedule knowledge sharing sessions for students
- vi. Feedback for framing Specific, Measurable, Achievable, Relevant, Time-bound (SMART) goals of alumni association

Here are few glimpses of such interactions that happened recently
